

AGILE PROJECT

THINGS DONE:

- Login and register
- Database entries
- Create project along with team
- Add project details
- Open project

THINGS LEFT:

- After opening the project, we will see the project first window.
- The main screen after opening the project.
- Now adding sprint, deliverables.
- Show project progress
- Create meeting and send notification.

And project over

WORK DIVIDED:

- UI
- Hosting
- Backend

NOTE: UI still need modifications.. because according to our project.. its not suitable.. so will send you the updated requirements for the screen I want..

I will do the backend..

And if someone is able to do hosting with 000webhostinger.com, then that's okay.. otherwise I will do it

THEN ANDROID PART WILL BE LEFT

ANY DOUBTS? LET ME KNOW..
